

Stewardship Tips

Weekly emails authored by Mark Olson to give anglers simple ways to help our lakes, streams and seas.

Want to catch more and bigger fish?
Leave a legacy of healthy fisheries to future generations?

Then sign up for our Stewardship Tip series, a weekly online lesson on how to be an effective steward of our waters.

Some Stewardship Tips are about things we can do on the water, like:

- > More effective Catch and Release
- > Doing Selective Harvest effectively
- > Lead-Free & Biodegradable Tackle
- > Making up for the other guy

Many Stewardship Tips are about things we can do every day to help our waters, because our lifestyle runs downstream.

- > Fish-friendly lawn care
- > Why recycling matters
- > Helping your bathroom use less water
- > The power of insulation
- > Household Hazardous Waste

The Stewardship Tip is sort of an “online correspondence course” and the only test is life. So sign up today and become an effective steward of our waters.

It's free to sign up at
www.RecycledFish.org/StewardshipTips

Recycled Fish is a 501(c) 3 non-profit organization. We engage, educate and equip anglers to be stewards of our natural resources both when we're fishing and through everyday living, because our lifestyle runs downstream.
